Companion Document For

ANSI ASC X12N 837D 4010A1 (Health Care Claim - Dental) Submission To

Alabama Medicaid

Original Publication Date: February 2003

The Health Insurance Portability and Accountability Act (HIPAA) requires that Alabama Medicaid, and all other health insurance payers in the United States, comply with the EDI standards for health care as established by the Secretary of Health and Human Services. The ANSI ASC X12N 837D - Dental implementation guides have been established as the standards of compliance for Dental Health Care Claim transactions. The implementation guides for each transaction are available electronically at www.wpc-edi.com.

The following information is intended to serve only as a companion document to the HIPAA ANSI ASC X12N 837D - Dental implementation guide. The table contains specific requirements to be used for processing data in the Alabama Medicaid Management Information System (AMMIS).

The use of this document is solely for the purpose of clarification. This document supplements, but does not contradict, any requirements in the ANSI ASC X12N 837D - Dental implementation guide. Additional companion documents will be developed for use with other HIPAA standards as they become available.

Note: The information in this document is subject to change. Please refer to the version number and effective date located in the footer of this document for the latest information available. Changes within the document will be in red type. A copy of the most current version of this companion document can be obtained from the internet at http://www.medicaid.state.al.us/HIPAA/index.htm.

ITEM#	LOOP	SEGMENT NAME	LANGUAGE
1.			It is recommend that the size of the transaction (ST-SE envelope) be no
			larger than 99,990 independent claims.
2.			Alabama Medicaid will convert all lower case characters submitted on an
			inbound 837D file to upper case when sending data to the AMMIS.
3.			You must submit incoming 837D data using the basic character set as defined
			in Appendix A of the 837D - Dental Implementation Guide. In addition to
			the basic character set, you may choose to submit lower case characters and
			the '@' symbol from the extended character set.
4.			The incoming 837D transactions utilize delimiters from the following list: >
			(greater than), * (asterisk), ~ (tilde), : (colon), (pipe), ! (exclamation point),
			and ^ (carat). Submitting delimiters not supported within this list may cause
			unpredictable results. Preferred delimiters are: ~ (tilde) for segment
			separators, * (asterisk) for data element separators, and : (colon) or > (greater
			than) for component data element separators. The usage of these characters
			within text data elements in the incoming 837D transaction may cause
			problems with creation of subsequent transactions.
5.			Only loops, segments, and data elements valid for the HIPAA 837D - Dental
			Implementation Guide will be translated. Submitting data that is not valid
			based on the Implementation Guide will cause files to be rejected.
6.			All dates that are submitted on an incoming 837D transaction must be valid
			calendar dates in the appropriate format based on the respective qualifier and
			corresponding date format defined in the implementation guide. Failure to
			submit a valid calendar date will result in rejection of the claim or the
			applicable interchange (transmission).
7.			Alabama Medicaid will process only one transaction type (records group) per
			interchange (transmission); a submitter must submit only one GS-GE
			(Functional Group) within an ISA-IEA (Interchange).

ITEM#	LOOP	SEGMENT NAME	LANGUAGE
8.			Alabama Medicaid will process only one transaction per functional group; a submitter must submit only one ST-SE (Transaction Set) within a GS-GE (Functional Group).
9.			We suggest retrieval of the ANSI 997 functional acknowledgment files on the first business day after the 837D file is submitted, but no later than five days after the file submission. A 997 (Functional Acknowledgment) will be returned to the sender once a transaction set is received and processed.
10.			File compression is supported for transmissions between the submitter and Alabama Medicaid. Any compression software that is compatible with PKZIP by PKWARE, Inc. is supported.
11.			Alabama Medicaid expects the Medicaid Provider Number to be in the Secondary Provider Id fields. In the future when NPI is implemented, the Provider Primary Id will contain the NPI number. Until the NPI is implemented Alabama Medicaid expects either the SSN or the EIN to be sent in the Provider Primary Id fields.
12.		Interchange Control Header	Use 'ZZ' as the Interchange ID Qualifier associated with the Interchange Sender ID (ISA05).
13.		Interchange Control Header	 Use the Provider Submitter ID assigned by Alabama Medicaid followed by the appropriate number of spaces to meet the minimum/maximum data element requirement of 15 bytes as the Interchange Sender ID in ISA06. For web submissions, the submitter id in the file must match with the user id that submits the file, otherwise the file will not be processed. There should be only one ISA/IEA envelope per batch file submission. For multiple transactions (ISA/IEA envelopes), a 997 will be returned for each ISA/IEA envelope within the batch. If only one 997 is
			desired, then the files in the batch should contain one set of ISA/IEA, GS/GE and ST/SE envelope segments per file.

ITEM#	LOOP	SEGMENT NAME	LANGUAGE
14.		Interchange Control Header	Use 'ZZ' as the Interchange ID Qualifier associated with the Interchange Receiver ID (ISA07).
15.		Interchange Control Header	Use '752548221' followed by 6 spaces (to meet the minimum/maximum data element requirement of 15 bytes) as the Interchange Receiver ID in ISA08.
16.		Functional Group Header	Use the Provider Submitter's ID assigned by Alabama Medicaid as the Application Sender's Code in GS02.
17.		Functional Group Header	Use '752548221' as the Application Receiver's Code in GS03.
18.		Functional Group Header	GS08 should be populated with '004010X097A1' and all changes per the addenda be incorporated in the 837D transaction.
19.	2010AA	Billing Provider Name	NM108 should equal '24' or '34' and NM109 should equal the Employer's Identification Number or the Provider's Social Security Number. Currently 'XX' is not to be sent. In the future when NPI is implemented, NPI will be required to be sent for the Provider Primary Id.
20.	2010AA	Billing Provider Secondary Identification Number	REF01 should equal '1D' Medicaid Provider Number and REF02 equal the primary Provider ID.
21.	2010BA	Subscriber Name	The Identification Code Qualifier element (NM108) will be 'MI' (Member Identification Number) and the Recipient ID will be entered into the Identification Code element (NM109).
22.	2010BA	Subscriber Secondary Identification	If the subscriber's SSN is provided within this segment, the Reference Identification Qualifier element (REF01) will be equal to 'SY' (Social Security Number) and the SSN should be entered into the Reference Identification element (REF02).
23.	2010CA	Patient Name	The Identification Code Qualifier element (NM108) will be 'MI' (Member Identification Number) and the Recipient ID will be entered into the Identification Code element (NM109).
24.	2010CA	Patient Secondary Identification	If the Subscriber's SSN is provided within this segment, the Reference Identification Qualifier element (REF01) will be equal to 'SY' (Social Security Number) and the SSN should be entered into the Reference Identification element (REF02).

ITEM#	LOOP	SEGMENT NAME	LANGUAGE
25.	2300	Original Reference Number (ICN/DCN)	If an adjustment needs to be made to a previously paid claim, REF01 will equal 'F8' and REF02 will equal the original Internal Control Number (ICN) that was assigned to the paid claim.
26.	2300	Admission Date	If the Place of Service is 21 (Inpatient (CLM05-1)), then the Admission Date segment is required on the claim.
27.	2310A	Referring Provider	If used and the SSN or EIN is not known, NM108 should equal '34' and NM109 should equal all 9's.
28.	2310B	Rendering Provider	If used, NM108 should equal '24' or '34' and NM109 should equal the Employer's Identification Number or the Provider's Social Security Number. Currently 'XX' is not to be sent. In the future when NPI is implemented, NPI will be required to be sent for the Provider Primary Id.
29.	2310B	Rendering Provider Secondary Identification	If used, REF01 should equal '1D' Medicaid Provider Number and REF02 equal the primary Provider ID.
30.	2320	Other Subscriber Information	Group Number for other insurance will be reported in SBR03.
31.	2330A	Other Subscriber Name	Policy Number for other insurance will be reported, the Identification Code Qualifier element (NM108) will be 'MI' (Member Identification Number) and the Policy Number will be entered into the Identification Code element (NM109).
32.	2330A	Other Subscriber Name	If the Other Subscriber SSN is known, it will be reported in REF02.
33.	2400	Line Counter	Make sure the Service Line LX segment begins with 1 (not 0) and is incremented by 1 for each additional service line of a claim (LX01). The LX functions as a line counter.
34.	2400	Dental Service	Only one oral cavity designation code should be submitted per service line detail.
35.	2400	Date – Service	Date of Service should be carried within the detail of the claim instead of at the header 2300 claim level loop.
36.	2000C	Patient Hierarchical Level	Dependent Level information will not be used for processing Dental Claims with Alabama Medicaid.
